

## **Supermarkets and Grocery Stores**

You can use this fill-in threshold estimation guide to identify if your facility may be subject to the Commercial Food Waste Disposal Ban. If you have any questions, please contact RecyclingWorks in Massachusetts by email (<a href="mailto:info@recyclingworksma.com">info@recyclingworksma.com</a>) or by calling 1-888-254-5525.

	Avera	ge Measurement	Material
Full Time Employees	3,000	lbs/employee/yr	Food waste
Disposed Waste	63	% of disposed waste by weight	Food waste

	# of Full- Time Employees	Average Food Waste Measurement	Average Annual Food Waste Disposed (lbs)	1 Week Divisor	TOTAL Estimated Food Waste Disposed Weekly (lbs)
Full-Time Employees		× 3,000 lbs/employee/year		÷ 52	

	Amount of Disposed Waste/Week (yd³)	Average Weight of 1 yd³ Disposed Waste  (1 yd³ = ~450 lbs)	Average Amount of Disposed Waste/Week (lbs)	% Food Waste Disposed Weekly	TOTAL Estimated Food Waste Disposed Weekly (lbs)
Disposed Waste		× 450 lbs		× 63% of disposed waste by weight	

If the "TOTAL Estimated Food Waste Disposed Weekly" in the final column is greater than 2,000 lbs, then your facility may be subject to the Commercial Food Waste Disposal Ban. If you do not have a food waste diversion program in place, contact RecyclingWorks in Massachusetts <u>by email</u> or by calling (888) 254-5525, or visit the RecyclingWorks website to learn how to begin a program today!

## If you have **35 full-time employees**, then:

3,000 lbs/employee/year \* 35 full-time employees = 105,000 lbs food waste generated/year 105,000 lbs/year ÷ 52 weeks/year = 2,019 lbs/week = 1 ton of food waste per week

## If you fill 1 trash dumpster at 4 cubic yards 2 times per week, then:

450 lbs \* (1 trash dumpster \* 4 yd $^3$  \* 2 pickups/week) = 3,600 lbs of total disposed waste/week 3,600 lbs \* 63% of total waste = 2,268 lbs/week = 1.1 tons of food waste in one week

**Note**: The equation based on weight of disposed waste (above) assumes a weight of  $450 \text{ lbs/yd}^3$  for mixed commercial waste materials. It was derived using the median value of EPA's standard conversion factor:  $1\text{yd}^3$  of commercial-industrial waste = 300 to 600 lbs. You may choose to change this number to best represent your operations.

**Tip**: Large supermarkets with a comprehensive recycling program in place should consider applying to MassDEP's Supermarket Recycling Program Certification, in which members qualify for certain waste ban regulatory relief. Learn more <a href="here">here</a>.
