# EPA Food Recovery Hierarchy

# Our Food Rescue Model: Direct Distribution

**60+ donors**  
**35,000+ pounds weekly**

grocery stores  
farms  
farmers markets  
produce wholesalers

**Same day delivery**

refrigerated delivery vehicles  
professionally trained drivers  
mobile inventory tracking system

**110+ non-profits**  
**20,000+ clients weekly**

homeless shelters  
soup kitchens  
food pantries  
crisis centers  
child care centers  
meal delivery programs

fresh fruits & vegetables

lean proteins

whole grains

dairy products

# Food Rescue Model vs. Other Solutions

Staffed by trained & certified employees

Refrigerated vehicles, ensuring the safest conditions for transporting food

On a consistent schedule

Digitally tracking product received, allowing for accurate reporting

Able to distribute product among a wide network of partners, ensuring the best use possible, and reducing waste

Collections are typically run by volunteers

Volunteers use their own vehicles

Collections are subject to volunteer availability

Not digitally tracked

Direct collections may be more than pantry needs, or not a direct fit for client needs, creating potential for food waste

Lovin' Spoonfuls can replace collections currently being made by volunteers for agencies, ensuring proper handling and best use of agency resources.

# Guaranteed Services

Our operational structure guarantees a consistent and safe service for our vendor partners. Additionally, we are able to offer:

- **Training for team members** – from department staff to receivers
- **Materials** – documents and guidelines to answer questions
- **Access to our management team** – providing contacts at both ends of the relationship
- **Troubleshooting** – in-store visits & reporting to ensure product is not being wasted

More than **4.1 million** pounds of food rescued
